

Water purifier SEAGULL IV® X-6

Field of application

- Hotels
- Restaurants
- Hospitals

Features

- pressure vessel in AISI 304 stainless steel
- easy replacement of the cartridge
- SPARK-L-PURE does not remove bacteria

Technical data

- Cartridge RS-6SG
- Retention 1 micron
- Flow 25 Lt/min
- Capacity 25.000 Lt*
- Dimensions Ø25,4xH44,5cm
- Operating pressure da 1 a 8 ATM
-

Phases of the purification process

1. Microfiltration through a structured matrix retention 0.1 micron con passaggio to remove water born pathogenic bacteria, parasites, radioactive particles and other micro particles.
2. Adsorption of organic chemical compounds by broad-spectrum absorbent substances particularly effective against chlorine, pesticides, herbicides and methylmercury
3. Bactericidal and not bacteriostatic action
4. permanent induction in the matrix of + and – electrostatic charges to remove even smaller particles

Item

10.05 Seagull IV X-6
